Corporate History

Top quality at reasonable prices

Since 1929, this philosophy has determined our range of products and services. To celebrate our 90th anniversary, we would like to invite you to a journey through time.

During his training in a glass factory, the later co-founder Theodor Felix Kraus came into contact with glazier diamonds for the first time and learned how to repair them. The First World War forced him to interrupt his training, but after his time as a soldier in France and Russia, his way led him first to Sweden and back to France where he acquired further knowledge and techniques in the production of diamond tools. Upon his return to Germany, Theodor Felix Kraus was already considered a specialist in the field.

On October 1st, 1929, Theodor Felix Kraus and the businessman Willy Winter founded the Kraus & Winter company at Lindenstraße 5 in Hamburg. The entry into the commercial register took place only 8 days later on 9th October 1929. The first target groups were glass, laboratory and natural stone companies and supplied with the first diamond tools. In 1935, less than 10 years later, the partner Willy Winter retired and Theodor Felix Kraus continued the company as sole owner.

In 1938, the company moved to Hamburg-Lokstedt Lottestraße 9-11 in order to meet increased customer demands and broadening capacity. Over the years, production was expanded into more and more areas.

In 1956 the office was moved to its present location in Hamburg-Lemsahl, and extended in by an annex.

His son Felix-Gunter Kraus joined the company at a young age during his apprenticeship. As a result, the range of diamond tools for all areas was supplemented by his devices for optical glass processing. Thus the field of ophthalmic optics also became potential customers.

Theodor Felix Kraus died in 1974. His son took over the company in the same year and led it safely into the new age.

After 90 years of experience, our company still relies on sound know-how in the manufacture of diamond and later CBN tools, intensive research and development work, state-of-the-art production methods, as well as a team of motivated and qualified employees and recognizes them as an essential basis for consistently high quality, forward-looking production optimization and innovation in our company.

By using the latest technology in our company, such as CAD workstations, ERP systems for monitoring order, production and delivery processing, as well as careful final inspections, we can guarantee you ontime delivery and the highest quality standard, even for custom-made products.

Armed with these prerequisites, we look forward to a future far beyond 2019.

Be a part of our advancement. We will be happy to advise you.

Single Point Diamond Dressers

Single Point Diamond Dressers

These single point diamond dressers are universally applicable. The quality of the rough diamond is of vital importance.

Therefore the assessment is made based on mineralogical aspects and our experience.

We offer three qualities:

Premium: ochtahedron diamond with 5 – 6 points, without chinks Standard: diamond with 3 points blocky form, small hairline cracks.

Basic: diamond with 1-2 points, blocky chatty form, inclusions and small cracks.

The price for single point diamond dressers with more that 1.00 carat is available on request.

Diamond Dresser Blades for Dressing and Profiling

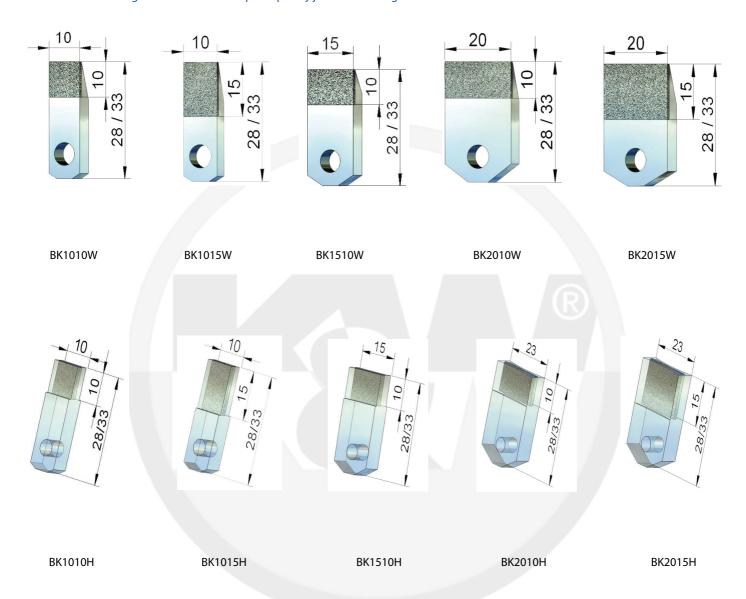

Technical Details of Diamond Grain Dressing Blades

Kraus & Winter diamond dressing blades are universal dressing tools which combines the positive characteristics of the single point dresser and the multi grain diamond dresser.

This diamond dressing blade is suitable for flat dressing as well as contouring and profiling.

The narrow face width (X) correspond to the working edge of the dressing and profiling diamond respectively.

The diamond dressing blades can be used up completely just like a multi grain diamond dresser.

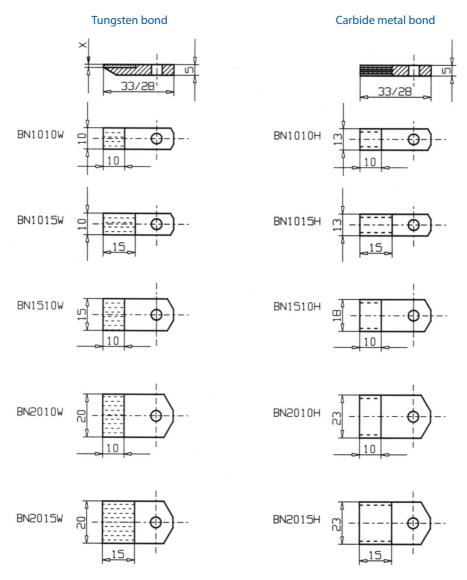

Length of dressing blades 33 or 28 mm.

ATTENTION:

Please indicate Art.No., length of the blade and grit size of the ceramic wheel!

Technical Details of Diamond Needle Dressing Blades

Kraus & Winter diamond needle dressing blades are equipped with high-quality diamond needles mounted using a special process. These needle dressing blades are used for easy profiles and larger grinding wheels with long dressing lines.

Length of dressing blades 33 or 28 mm.

ATTENTION:

Please indicate Art.No., length of the blade and grit size of the ceramic wheel!

Multi Grain Diamond Dressers and Ultra Fine Diamond Dressers Type VK und AA

Multi Grain Diamond Dressers

The sintered components of our diamond multi grain dressers are equipped with several single diamonds or abrasive diamond grit in one or more layers. The number of diamond used depends on the grit size of the grinding wheel to be dressed.

Advantage of these diamond multi grain dressers is that they can be completely used.

Diamond Dressing Strips Type DAL

Diamond Dressing Strips Type DAL

Kraus & Winter Diamond Dressing Strips sind einseitig mit einer galvanischen Diamantbeschichtung versehen und werden auf Flachschleifmaschinen zum Abrichten von kunstharzgebundene CBN-Schleifscheiben eingesetzt.

Für das Abrichten ist der Einsatz von Kühlmittel erforderlich und anschließend muss die Schleifscheibe mit unseren Abziehsteinen geschärft werden.

The Diamond Grit Size richtet sich nach der Körnung der abzurichtenden CBN Grinding Wheel.

Diamond Polishing Paste

Diamond Polishing Paste, high Concentration, in Plastic Syringe

We offer only highly concentrated diamond polishing paste as these are more cost efficient than the diamond paste with normal concentration. The concentration can at any time easily be reduced by delution.

Only high quality diamond grit is used for our diamond polishing paste. The plastic syringe allows fine dosing without any difficulty.
